

Why Snagging is Essential in Bu Kadra – Custom Villas Need Professional Oversight

Bu Kadra, located near **Ras Al Khor** and **Meydan**, is becoming a hotspot for privately built villas and self-developed plots. But with **no single master developer overseeing quality**, construction standards can vary dramatically—from villa to villa, even on the same street.

Whether you're **building your dream home** or buying a completed property from a private seller, **snagging inspections in Bu Kadra are critical**. We've uncovered issues ranging from **structural cracks** to **HVAC faults** and **waterproofing failures**—often missed when contractors work without third-party oversight.

Why Choose Us

- **✓ Over 44,000 inspections** across Dubai's custom villa zones
- **✓** Experts in non-developer and owner-built projects
- **✓** 12-hour report turnaround using Spectora & Onsite software
- **✓** Complete inspection coverage—from slab to roof
- **✓** Ideal for homeowners, contractors, and private investors
- **✓** Ongoing DLP and contractor dispute support

What We Inspect in Bu Kadra Villas

Custom villas require **deep, room-by-room inspections**, as construction quality heavily depends on the contractor's standards—not developer protocols. We offer **full-scope snagging** tailored for these unique builds.

Foundation & Structural:

- Roof slab cracks, slope issues, and water pooling
- Settlement cracks in walls, parapets, and columns
- Terrace/balcony waterproofing membrane tests
- Blockwork quality, plaster consistency, and curing issues

finishing:

- **Floor leveling**, tile lippage, hollow tile detection
- Skirting, grout gaps, chipped corners
- False ceiling alignment and hairline cracks
- Staircase strength, finish, and handrail installation

DUBAI PROPERTY SNAGGING

INSPECT BEFORE YOU INVEST

Bathrooms & Kitchen:

- Drainage slope testing and pressure balancing
- Mixer taps, WC seals, and exhaust fan functionality
- Cabinet installation and countertop leveling
- Mold-prone zones, ventilation, and tiling defects

MEP (Mechanical, Electrical, Plumbing):

- **DB board safety**, socket polarity, and load distribution
- HVAC ducting, insulation, airflow test
- Booster pump and water heater inspection
- Drainage pipe routing, backflow checks, and leakage detection

Projects We Cover in Bu Kadra

We inspect all types of private builds and villa projects in Bu Kadra, including:

- 4, 5, and 6-bedroom custom-built villas
- **Corner plots** with full or partial handover
- Villas with basements or rooftop terraces
- Projects led by independent or owner-appointed contractors
- Ongoing construction, final snagging, or post-handover review

Real Client Story: 5BR Custom Villa Snagging

Mr. Zahir, a self-builder, contacted us for a full snagging inspection before moving into his new **5-bedroom villa in Bu Kadra**. Though the home featured premium marble and German fittings, our inspection revealed:

- Poor **tile slope** in all bathrooms, leading to water retention
- Improper terrace waterproofing on the first floor
- Loose AC conduits and untested drainage connections

Our team flagged **52 issues**, and Mr. Zahir used the report to finalize repair work with his contractor before occupancy.

His feedback: "It's the only step that protected me after months of construction."

Don't Assume a Contractor's Word Is Enough

Custom homes are personal—and often emotional—but when it comes to final delivery, you need a **professional eye**, not just a handshake.

INSPECT BEFORE YOU INVEST

Let us help you **protect your investment**, avoid costly surprises, and move in with full peace of mind.
