

Why Snagging Is Critical at Canal Front Residences – Waterfront Living Demands Flawless Delivery

Canal Front Residences by Meydan offers luxurious, low-rise waterfront living along the **Dubai Water Canal**, with serene views of **Safa Park**, modern architecture, and premium interiors. Whether you're an end-user preparing to move in or an investor protecting a high-value asset, a **professional snagging inspection is essential**—even in brand-new units.

We've identified issues like **flooring defects, poor AC airflow, inadequate sealing, and water seepage**, even in luxury units. Our inspections ensure your apartment is 100% handover-ready—**no surprises, no compromises**.

Why Choose Us

- ✓ **44,000+ inspections** completed across Dubai
- ✓ **Specialists in waterfront, premium, and low-rise units**
- ✓ **12-hour turnaround reports** with Spector & Onsite tools
- ** ✓ In-depth knowledge of **Meydan finishing and build quality
- ** ✓ Full DLP (Defect Liability Period) support with developer coordination
- ✓ **Trusted by buyers, landlords, and international investors alike**

What We Inspect in Canal Front Residences

Waterfront apartments face **environmental challenges**—from humidity to salt-laden air—which can accelerate wear and expose weak finishing. Our snagging process covers every detail to ensure long-term quality and value.

Interior & Finishes:

- **Tile lippage**, hollow areas, and chipped corners
- Wall cracks, paint unevenness, and visible joint lines
- Wardrobe tracks, cabinet hinges, and door alignment
- **Window locks** and seal inspection for air/dust/water intrusion

Bathrooms & Kitchen:

- **Drainage slope testing** and water pressure checks
- Silicone sealing and grout line finish
- Countertop alignment, backsplash sealing
- Shower mixer, WC, and tap leakage checks

MEP (Mechanical, Electrical, Plumbing):

- **Distribution board (DB) review**, socket polarity, and switch function
- AC airflow, duct sealing, and **thermostat calibration**
- Water heater, booster pump, and pipe layout testing
- Plumbing insulation and leak detection

Balcony & Façade:

- Balcony **drainage test** and slope verification
- Glass railing safety and height compliance
- Façade seals and large glass door waterproofing
- Check for rust or corrosion due to canal humidity

Buildings & Units We Cover at Canal Front Residences

We inspect **all unit types and buildings** within Canal Front Residences, including:

- 1BR, 2BR, and 3BR luxury apartments
- Ground-floor garden-facing units
- **Canal- and park-facing layouts**
- Penthouses with extended balconies or terraces
- Off-plan handovers or resale inspections

Real Client Story: 2BR Canal-Facing Unit

Ms. Farida, a real estate investor from Singapore, booked a snagging inspection for her **2-bedroom canal-facing unit** before final payment. Despite the apartment's premium finishes, our team found:

- Water seepage under the **kitchen sink cabinetry**
- Poor **silicone sealing** in both bathrooms
- Warped **bedroom door frame** due to AC condensation buildup

We provided a detailed photographic report that was submitted to Meydan's handover team. All issues were resolved within 8 working days.

Her feedback: *"Without this inspection, I would've missed critical finishing errors. Worth every dirham."*

Don't Let a Luxury Finish Hide Defects

Just because it looks perfect doesn't mean it is. **Waterfront properties** are especially vulnerable to finishing flaws that become expensive headaches later.

Let us help you take **confident handover**—with clarity, proof, and professional documentation.
