

Why Snagging Is Critical at Emaar Beachfront

Emaar Beachfront is one of Dubai's most exclusive waterfront communities — where iconic sea-facing towers meet private beaches, yacht marinas, and resort-style living. With handovers now in progress across towers like **Beach Vista**, **Marina Vista**, **Grand Bleu**, and **Seapoint**, buyers are eager to step into luxury.

But even the most prestigious projects can have hidden defects: **misaligned fittings**, **AC duct leaks**, **paint flaws**, or **salt-induced damage**. Many units are rushed during final handover, and quality checks are inconsistent.

That's why a **professional snagging inspection** is not just recommended — it's essential.

✓ Why Clients Trust Our Emaar Beachfront Inspections

- ✓ **44,000+ inspections across Dubai's top-tier developments**
- ✓ **High-rise specialists** trained in MEP, waterproofing, and façade inspections
- ✓ **12-hour report turnaround** with **Spectora & Onsite** software
- ✓ **Certified inspectors familiar with Emaar's construction standards**
- ✓ **DLP (Defect Liability Period) support** — we follow up with developers
- ✓ **Fully insured, investor-trusted, and end-user friendly**

Whether you're moving in or leasing out — our detailed snag report protects your investment.

What We Inspect at Emaar Beachfront Towers

High-rise beachfront properties demand a unique approach. Salt air, humidity, and complex MEP systems mean standard inspections aren't enough. Our engineers are trained to catch **hidden issues** often overlooked during handover.

Interior & Finishing

- Hairline cracks, poor plasterwork, and inconsistent paint
- Scratches on marble/wood flooring and misaligned tiling
- Loose handles, faulty soft-close doors, and frame warping
- Uneven walls or ceiling-level irregularities

Kitchen & Bathrooms

- Improper grouting and countertop level issues

- Shower mixer faults and under-sink leaks
- Fan exhaust function, mirror alignment, silicone sealing
- Cabinet installation checks and appliance gaps

MEP (Mechanical, Electrical, Plumbing)

- AC airflow, noise, and condensate drainage
- Socket power test, switch misalignment, DB board review
- Water pressure and mixer balance testing
- Water heater safety, thermostat, and accessible isolation valves

Balcony & Façade

- Glass railing height, alignment, and safety locking
- Drainage flow and tile slope on balcony
- Salt exposure signs, external cracks, and paint blistering
- Façade inspection (visual and thermal camera if needed)

Towers We Inspect in Emaar Beachfront

We cover **all current and near-handover towers** in the Emaar Beachfront master plan, including:

- **Beach Vista**
- **Marina Vista**
- **Sunrise Bay**
- **South Beach Holiday Homes**
- **Grand Bleu Tower (Elie Saab Residences)**
- **Palace Beach Residence**
- **Bayview**
- **Seapoint**
- **Beachgate by Address**
- **Address Residences The Bay**
- **Beach Isle**
- **Coral Reef Residences**
- *Any upcoming tower — we're ready to inspect.*

Real Client Story: Grand Bleu Tower (Elie Saab Residences)

Mr. Karim, an investor from Europe, booked us to inspect his **2-bedroom unit at Grand Bleu Tower**. On the surface, the apartment looked flawless — but our inspection revealed **43 defects**, including:

- A bathroom floor **sloping incorrectly**, causing drainage issues
- **AC duct leakage** concealed above the false ceiling
- **Salt damage discoloration** near the balcony threshold

Our engineer issued a clear photo report categorized by severity. Mr. Karim submitted it directly to Emaar — and **all issues were resolved within 14 days**, well before his tenant moved in. He later shared our report with three other friends purchasing in the same tower.
