

Why Snagging Is Essential in The Greens, Dubai

The Greens by Emaar is one of Dubai's most beloved low-rise communities—offering peaceful, garden-style living just minutes from **Sheikh Zayed Road, Dubai Internet City, and Mall of the Emirates**. With mature trees, shaded walkways, and a true neighborhood feel, it's a favorite for families, end-users, and rental investors alike.

But with most buildings now **10–20 years old**, even well-maintained apartments can have **hidden wear and tear**. Renovated units may look good on the surface—but beneath the paint, there may be serious issues: **water damage, faulty wiring, poor sealing**, or outdated plumbing.

That's where our **specialized snagging inspections** come in. Whether you're buying, renting, or preparing to list a unit, we help you **understand the true condition** of the apartment—before any surprises surface.

✓ Why Residents of The Greens Choose Us

- ✓ 44,000+ inspections completed across Dubai
- ✓ Experts in older buildings, resale units, and renovation defects
- ✓ Detailed photo report delivered same-day via Spectora & Onsite
- ✓ AC, plumbing, electrical, and waterproofing fully tested
- ✓ Support negotiating repairs or discounts after inspection
- ✓ Transparent pricing, fast booking, and certified team

🔍 What We Inspect in The Greens Apartments

Properties in The Greens typically consist of mid-rise, walk-up buildings with underground parking and shared amenities. Our snagging process is tailored for **mature apartments, resale units, and landlord-retouched properties**.

🏠 Interior & Finish Quality

- Cracks in walls and ceilings—especially around corners and joints
- Paint touch-ups concealing past leaks or dampness
- Scratched tiles or worn wood/parquet flooring
- Window alignment, sealant quality, and locking mechanisms
- Door frame stability and soft-close hinge checks

Kitchen & Bathrooms

- Water pressure testing in showers and taps
- Drainage speed and leakage under basins
- Poor grouting, silicone seal failure, or mold signs
- Cabinet hinge strength and alignment
- Exhaust fan performance and duct ventilation

MEP (Mechanical, Electrical, Plumbing)

- DB board safety: loose wires, overload risks
- Socket power and polarity testing
- Lighting switch alignment and LED compatibility
- Water heater performance check
- AC airflow, filter cleanliness, duct drainage

Balcony & Common Elements

- Balcony railing integrity and water drainage slope
- Signs of external water intrusion (walls, ceilings)
- Entrance door alignment and security latch/peephole
- (Optional) Shared area checks: garbage chute, corridor condition

Buildings We Inspect in The Greens

We inspect all buildings in the community, including:

- **Al Arta**
- **Al Dhafrah**
- **Al Alka**
- **Al Thayyal**
- **Al Ghozlan**
- **Al Samar**
- **Al Jaz**
- **Al Sidir**
- **Al Nakheel**
- **Al Ghaf**

If you're unsure about the condition of your apartment or recently completed a renovation—**our inspection can save you thousands in post-move-in repairs.**

 **Real Client Example: Al Alka Building**

Ms. Neha, a first-time buyer, booked our snagging inspection for her 1-bedroom apartment in **Al Alka**. On the surface, the unit looked freshly painted and staged. But during inspection, our engineer uncovered:

- Wall cracks that had been patched and hidden behind furniture
- Critically **low shower water pressure**
- A **loose socket** with risk of electrical short circuit

Thanks to the detailed report, she renegotiated the sale price **and got repairs included before transfer**.

“The report paid for itself five times over,” she told us
